PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with concurrent internship experience in Full Stack Development and Android Application Development. Proficient in JavaScript, Python, TypeScript, React.js, Node.js, and Kotlin, with a strong foundation in Data Structures & Algorithms, OOP, DBMS, and REST API design. Experienced in Agile SDLC environments, Git-based version control, and cross-functional collaboration. Adept at building scalable, production-grade applications — from responsive web interfaces to cloud-integrated backend services and native Android apps.

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, SQL, Kotlin, HTML5, CSS3

Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Flask, Django, Tailwind CSS

Databases & ORM: PostgreSQL, MySQL, MongoDB, SQLite, Room Database, Prisma ORM

Tools & Platforms: Git, GitHub, Android Studio, VS Code, Postman, Linux, Google Dialogflow

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs,

AI / ML: TensorFlow, Scikit-learn, XGBoost, OpenCV, CNN, Face Recognition

INTERSHIP EXPERIENCE

Note: Both internships were completed concurrently during the final year of study.

Full Stack Developer Intern — Gupio

Jan 2026

- Contributed to the development and enhancement of multiple products, including the CRM platform, FacilityBot facility management system, Gupio website, and data scraping solutions using React.js, TypeScript, React Native, Node.js, and Express.js.
- Designed and integrated RESTful APIs, implemented features such as RBAC, QR code-based asset tracking, dashboards, and supported database design and optimization using PostgreSQL/MySQL and Prisma ORM.
- Performed manual testing, debugging, code reviews, and issue resolution across frontend and backend modules to improve application quality, reliability, and performance.

Android Application Developer Intern — MindMatrix.io (CL Infotech Pvt. Ltd.)

Jan 2026 – May 2026

- Engineered 'Namma-Mela', a real-time theatre ticket booking Android app in Kotlin using MVVM architecture, Retrofit for REST API integration, and Room Database for offline-first data persistence.
- Implemented live seat availability monitoring, end-to-end booking management, and a responsive UI optimized for performance across multiple Android device configurations.

PROJECTS

FacilityBot — Smart Facility Management System | React.js, TypeScript, Node.js, Express.js, Prisma ORM, PostgreSQL, REST APIs

- Developed a full-stack facility management platform to streamline asset tracking, maintenance operations, user management, and administrative workflows through a centralized web application.
- Built secure RESTful APIs with JWT-based authentication and role-based access control (RBAC), enabling differentiated access for administrators, managers, and technicians.
- Implemented QR code-based asset identification, inventory monitoring, maintenance request handling, and lifecycle management features to improve operational efficiency.
- Designed responsive dashboards for real-time visibility into facility operations, asset status, maintenance schedules, and system activities.

Clinical Decision Support System (CDSS) — Chest X-ray Analyzer | Python, CNN, TensorFlow, React.js, Django REST API

- Engineered a CNN-based deep learning model for automated pneumonia detection from chest X-ray images, incorporating preprocessing pipelines and Grad-CAM heatmap visualization for clinical interpretability.
- Built a React.js frontend integrated with a Django REST API, featuring user authentication, real-time prediction results, and automated diagnostic report generation.

AI-Powered College Enquiry Chatbot | Python, Flask, Google Dialogflow, SQLite, HTML, CSS, JavaScript

- Designed and deployed a conversational AI chatbot using Google Dialogflow to automate student query resolution, featuring session-based authentication and secure password reset workflows.
- Built a Flask backend with SQLite for persistent data management, delivering real-time NLP-driven chatbot interactions through a fully responsive web interface.

EDUCATION

B.E. in Computer Science & Engineering

CGPA: 9.1

Navkis College of Engineering, Hassan — Visvesvaraya Technological University (VTU)

Pre-University (PCMB)

Score: 90%

Masters PU College, Hassan

CERTIFICATIONS

Data Structures & Algorithms — Infosys Springboard | Artificial Intelligence Basics — Simplilearn | Python for Beginners — Simplilearn
